## **Technical Information**

### **BEM Foundation**

A foundation consisting of blockchain specialists and experts in marketing and market creation.

### **BEMT Token**

The name of the token offered by BEM Foundation.

The BEMT token is used instead of money for participants in all entrepreneurship and job creation plans and all programs designed by the foundation.

### **What does BEMT stand for?**

BEMT stands for 'Best Economic Money Token'.

## **Technical Information**

### **BEMT BlockChain**

BEMT is a token that was launched on the Tron Blockchain.

BEMT is a TRC20 token.

BEMT has inherited all features of TRX, its most remarkable ones being high transaction speed and low transaction costs.

Total Supply : 30,000,000

BEMT has 6 decimal digits like TRX.

Blockchain Explorer : [tronscan.io](https://tronscan.io)

Contract Address : [TBp6ZMzkxci5o4sJjFa6Fo9Wy36gcubQLW](https://tronscan.io/address/TBp6ZMzkxci5o4sJjFa6Fo9Wy36gcubQLW)

Website : [www.beminfo.io](https://www.beminfo.io)

### **BEMT Release Date**

BEMT Release Date in November 8, 2020

## **Token Distribution Policy**

The BEM Foundation has considered 2 time periods for distribution of BEMT tokens in the markets.

**Advance Sales: 20 days**

It starts at 12:00 GMT on November 8, 2020 and lasts until 12:00 GMT on November 27, 2020.

## **Main Sales : 5 months**

The main sales start as of 12:00 GMT on November 27, 2020 to 12:00 GMT on April 7, 2021.

## **Token Pricing**

The BEM Foundation prices the tokens according to its value, primary capital, expenditures, and financing needed for future projects, and of course in view of its backing policies.

Price of each BEMT in pre-sale:

1 BEMT = 2 TRX

Price of each BEM in regular-sales:

Phase 1: 1 BEMT = 10 TRX

Phase 2: 1 BEMT = 40 TRX

Phase 3: 1 BEMT = 100 TRX

Phase 4: raising the prices in the market up to a bottom price of 1000 TRX by means of creating demand and supply.

## **Token Burning Policy**

BEM Foundation has produced 50,000,000 BEMT tokens, but that will not be the final number.

Once the main sales period is completed, the tokens not presented in the markets will be burned by a bemdefi.io smart contract in order to manage the prices and raising the value of sold tokens. The remaining (unsold) BEMT tokens will be burnt on April 7, 2021 and the final count of BEMT tokens will be known then.

## **Who are the creators of BEMT? Who manages BEM Foundation?**

In the world of blockchain , and particularly concerning cryptocurrency , the first principle is to protect identities and secrets of assets and inventories, with the purpose of protecting people's interests from any risk.

Activities of BEM Foundation are mostly focused on entrepreneurship and job creation , and identities of the token creators have to be kept hidden in order to protect the interests of participants and investors and prevent the projects from any kind of risk.

The identities of BEMT creators is not officially disclosed. It suffices to know that they are experts on markets and blockchain technology, and have participated in several other successful projects, the names of which cannot be disclosed due to the risk of interference with other projects or digital currencies.

The validity of a token is defined by its activity type, progress and expansion of programs, future plans and compliance with them.

BEM Foundation is a self-sufficient organization that does not rely on any country, state, organization or person of any kind. All BEM projects are funded first by members' primary investments and then by BEMT sales. This process raises the innate value of the foundation and the token very much, because the rising of the value of this token then depends on efforts dedicated to make it more valuable not on any person or special program.

Developers and members of the foundation willing to own BEMT shall have to buy it from projects or money exchangers at the same approved prices, and no BEMT shall be put aside for special people or managers.

Frankly, all distributions of career platforms will be managed by smart contracts and DEFI projects. All projects will be of open source type.

## **Goals of BEM Foundation**

- Preparation suitable and safe occupational grounds in blockchain systems.
- Creation of various platforms by smart contracts technology with the purpose of enabling participants and fans to make money in blockchain systems by BEMT.
- Workspace stability, sound job types, project safety in terms of preventing changes in work policies, safety in payments and deposit of commissions, protection of participants' investments and value and assets of holders.

## **The Goal Behind Creation of BEMT**

Creating a special currency unit for projects so that participants and holders make money by working in projects and also from rising of the currency values based on market expansion, for which they are partially responsible.

In fact, BEM Foundation plans to create a space with BEMT that ensures people interested in participating in and making money from various career platforms that the projects are totally safe and reliable.

## **What Problems does BEMT Solve?**

In multi-level projects in which the commission has to be distributed among many people, and particularly in projects where the number of participant attraction and commission distribution levels are too many, the platform owner normally face to main problems due to blockchain rules:

1. Limited NODE transmission for calculating the commission of each person.
2. Very high transaction expenses; so high that the blockchain itself halts the transactions of the given platform

In most platforms calculations and payment of commissions do not face any problem at the start because the number of participants is small. But as soon as the project expands and right when people want to witness the results of their efforts, the calculations fail and the commissions are blocked either by blockchain or the platform owner gains no economic profits to pay the commissions, so that platform eventually fails.

In smart contracts there is no way to change or correct, and they cannot solve this problem even if definitions are variable, because the solution is only in the hands of the BEMT creating team.

Actually, BEMT has successfully solved the issues of unlimited levels and dense commissioning pools, resulting in creation of stable career platforms that never fail or pose any risk or threat towards people's interests, and allows all platforms to be of smart contract type.

## **Job Opportunity in Blockchain with BEM Token:**

One of the most attractive careers in the world today is the Network Marketing business. This business has always had huge numbers of fans and audiences around the world. In the blockchain system though, “network marketing” is different from its real world counterpart. In the real spaces of counties, network marketing is always around a product or a service. In fact, they distribute products in markets and among customers with their special way of selling.

But in blockchain the products are new tokens or currencies temporarily frozen with benefits; and money making plans are put in place for visitors, leaders, instructors and developers of that network marketing platforms.

One of the most favored network marketing plans is the binary plan in which all members of the sales organization are beneficiaries and sales in that plan are stored for them. This plan is not implemented by smart contracts due to the huge number of people and calculations, but in regular sites it faces changes in policies and strategies by company managers or owners.

Although BEM Foundation has made it possible with BEMT for people to work freely worldwide without any concern for any changes, ensured that their identities and financial secrets remain safe.

By reading through the White Paper, a BEM Foundation project, you will get a very good knowledge of the unlimited money making plan, and of course the above arguments.

## **Advantages of Buying BEMT:**

The value of most currencies rise only through demand, supply, sales and purchase by holders and investors. The use of these currencies and their programs is mostly limited to ideas or need a lot of time for execution and implementation. By mere ownership of an idea, they distribute the currency among people and raise its price.

But other than being sold, purchased and held by holders like all other currencies that naturally gives it more value, BEMT may also be used at present time, that is inside the career platforms where people can only participate by BEMT.

The unlimited money making plans follow the rules of progression, as the sales organization of the platforms grows so does the demand for BEMT, and this goes on until the 6th decimal digit of the token is made valuable.

Participants in BEM platforms gain BEMTs by working in the projects, and at the same time raise the dollar value of their BEMTs.

## **Advantages of Using BEM Foundation Platforms:**

The most important advantages are as follows: projects in which BEM Foundation is either owner or sponsor will never bring losses or frauds, and BEM Foundation handles any possible problem or issue, because the slightest issue will also distort the credit of BEMT and cause its value to drop.

It is for this same reason that experts who work on the projects around the clock and provide 24-hour support so that they can continue their operations with the highest quality.

## **Cooperation with BEM Foundation:**

People with big attractive entrepreneurship ideas and the will to develop and expand their startups in blockchain space will find that BEM Foundation provides the infrastructures required for their activities.

Drawing up the smart contracts of those startups and providing the funds for executing them are among the services provided by the foundation.

Ideas generally being with a special kind of idealism and face development challenges on their path. BEM Foundation does not care how simple an idea might seem because it creates the development path for each idea. In the blockchain space a goal may be executed all over the world at any moment.

BEM Foundation makes and connects a chain of these ideas, creating a community of presented ideas and a community of potential demands.

At the start of each business in the BEM system, BEM Foundation will develop the required infrastructure and provide it to the potential applicants. Each holder in the BEM system may turn into an idea creator and start his/her own business in the blockchain space, and at the same time that holder may follow his/her needs in BEM platforms.

The presentation of the business or ideas of a holder in the BEM system is a sign of its reliability. Development, execution or provision of the infrastructures for that business is the specialty of BEM Foundation.

**Note 1:**

Projects will be analyzed before execution to prevent financial losses to people or their use for negative intents and projects, and the financial capacities of applicants are thoroughly reviewed.

The BEMT token will be used in such projects, which stands as an index to project safety and guarantee for its survival.

**Note 2:**

All ideas and projects submitted to the R&D team are kept confidential, never been disclosed or copied.

## **BEM Foundation and Environmental Protection:**

Today people around the world have changed some of their habits and become more sensitive towards environmental protection. With some minor changes in a very limited manner, you will feel more lively and fresh, and will be able to share that feeling with others.

Some of the bigger firms are trying to set their policies around the ideas of environmental protection. Environment loving companies have taken many steps towards reducing air pollution, developing landscapes, economy in consumption of energy, and supporting animals, etc.

Unlike other currencies like BITCOIN and ETHEREUM, BEM Foundation has not considered any particular hardware for mining BEMTs, because mining by hardware machines requires huge amounts of electric power, which it turn has severe environmental impacts.

BEM Foundation dedicates 1% of its net annual profits to bankroll environment protection associations. The names of such associations and the types of operations they undertake for environmental protection are presented in the social medial of BEM Foundation once funds are paid to them.

## **Future Plans**

### **Cryptocurrency Exchange Platform:**

BEM Foundation is always on the look to identify and foresee the great opportunities for entrepreneurship and creation of developing employment fields.

Another program of BEM Foundation is to create a crypto exchange with the goal of offering its customers all around the world digital assets transaction services according to relevant rules.

The created exchange with easy access and low transaction charges will support most blockchain coins and tokens. The exchange alone shall serve as a space for online deals and making money. This type of activity is also very good for the main goal of BEM Foundation, i.e. creation of suitable occupational spaces.

### **On-Change Gaming:**

BEM Foundation foresees that blockchain technology is capable of revolutionizing the online gambling industry, and the players should of course be provided with a safe and transparent environment.

# Beminfo.io

BEM Foundation intends to solve challenges such as low transmission speed in games, game result manipulations, and delays in payment of money, and to create games with high graphics and attraction inside the blockchain space by BEMT token.

BEM Foundation might also participate in programs such as liquidity, online casino, video sharing portal, decentralized lending, etc.

## **Vision**

The main goal of BEM Foundation is to create a private BEM blockchain. This blockchain shall handle the writing of smart contracts in view of the needs of games and entrepreneurship programs. Each group of projects shall have their own private tokens or coins.

This private blockchain is aimed as facilitating the creation of network marketing projects, so that the regular network marketing sites in various countries can use the BEM blockchain and all concerns for quick and consistent commission payments and banking relations are totally tackled and solved according to laws of each country.

Companies will be able to use the smart contracts of BEM blockchain to go multinational and expand their sales networks into various countries.

Once the BEM blockchain is created, all tokens made in other blockchains will be swapped to BEM blockchain itself. Each BEMT will be swapped to a BEMC (Best Economic Money Coin).

## **Business for Home in Corona Conditions:**

As the coronal virus pandemic gained momentum throughout the world, many people lost their jobs. The loss of jobs and sources of income have resulted in bankruptcy and hardening of financial conditions for many others.

In order to create and run a new job, people need expertise and experience, new ideas as well as funds and support, which are not available to all people.

In such harsh conditions that have affected all of the world population, BEM Foundation has designed platforms through which people can make money with very small expenses and without any need for expertise or previous experience, and then expand their operations and gain bigger financial gains by working harder.

In such platforms experience and expertise are conveyed by leaders and guides through the cyberspace free of charge. People can learn the skills without paying the huge amounts normally needed for such courses.

**Beminfo.io**

The only money that people should pay is for buying the currency that will then belong to them, and they may sell them at current prices anytime, and even make profits.

People may use communication applications in the cyberspace to work and operate freely throughout the world, and to make money by selling the currency of the foundation, and even form groups and teams to make more money.

## **Final Word**

The value of a currency is determined by the member of the society. They can make it more powerful by keeping, promoting and introducing it to others and by participating in its projects. They can also make it weaker.

BEM Foundation is dedicated to its projects and tokens, and hopes that BEMT will be spread through into a community of dedicated people.
